Unlock the Capital Value of Your Business

Family Security and Business Continuity

In the event of your untimely death or disability, your family may want to be paid out your share of your business. But your business partners may not have the capital.

Business Assurance provides this capital. It is the solution to a potentially disastrous situation. **It is vital for all private companies, close corporations and partnerships.**

Business Assurance is a legal contract with assurance. It caters for your specific business requirements, including complex Estate Duty and Capital Gains Tax considerations.

Silke Financial Services has the legal expertise to ensure the security of your family and the future of the business.
